

UVC box

INSTRUCTION MANUAL

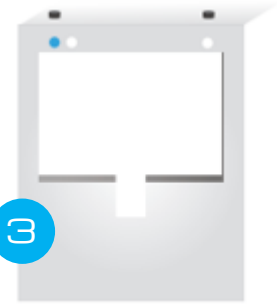

1

The UVC BOX is on standby.

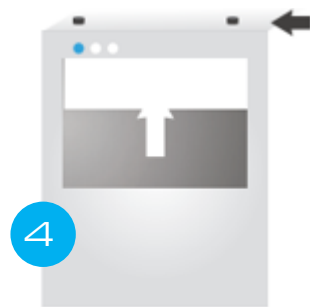

2

The touch-free sensor is activated and the hatch opens.

3

The items are inserted.

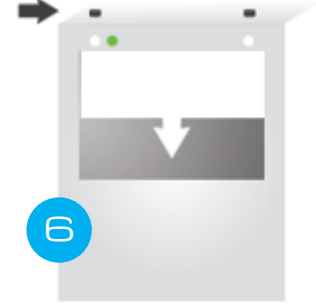

4

The disinfection is activated with the touch-free sensor and the hatch closes.

5

LED lamp changes to red. The disinfection takes 2 minutes.

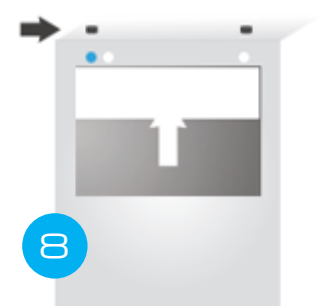

6

After 2 minutes, the LED lamp changes to green. Open the hatch with the touch-free sensor.

7

Items are now 99.99% microbe free.

8

The hatch closes, either manually or automatically after 2 minutes.

9

If the blue and green LED lamps light up at the same time, zero the box by holding both hands over the two sensors at the same time for 10 seconds.

NOTICE:

UVC box must not be used for liquids and live animals and people
